EQ-CM40A-HOLE	Hole - 3/16" for key rings
EQ-CM40A-SLT+size	Slot - 1/8"x9/16" for ID straps

PRINTMARK™ PrintMark I - Print Receptive & Rotary Engravable

PrintMark has a gloss finish and contains an acrylic cap and an ABS core, similar to that contained in the Rowmark® Satins and New Hermes® Gravoply 1. It is available in 1/16" (1.5mm) gauge for use in interior signage, industrial marking and personal identification among other applications. It has been fully tested for use in the direct color systems™ Millennium, 1224 and Badger printing systems for both the full color and monochrome applications. Suggested fabrication methods include rotary engraving, rotary profiling, saw cutting, shear cutting and beveling. Laser engraving and profiling, heat press sublimation and score/snapping processes are not recommended. *NS

Some color/size combinations available by special order only. Call for specifics. Allow 2-3 weeks shipping. Special Cut sizes and sheet 24"x48" size also available. Call for quote.

PRINTMARKII™ PrintMark II - Print Receptive & Laser Engravable

PrintMark II is comprised of a modified acrylic resin similar to those found in the Rowmark® Lasermark, Lacquer and Flexibrass lines. It is available in .020" and .060" gauge. It has been fully tested for use in the direct color systems™ 1224, Millennium and Badger printing systems for both the full color and monochrome applications. Suggested fabrication methods include laser engraving and profiling, rotary engraving, rotary profiling, saw cutting, shear cutting and beveling. Heat press sublimation is not recommended. All products in this line have a special adhesive with a non-slip liner. If applying your own adhesive, ensure you have similar characteristics or you could encounter poor registration when printing full color images. NOTE: Black PMII products are recommended for monochrome ribbon applications only! Note: Clear material requires (and is provided with) PAPER masking on bottom for printer sensor recognition (needed for Millennium/Badger printers only).

Print Receptive Coated Metals

These .023 Aluminum and .019" Brass are print receptive for use in the DCS line of printers. This material is coated with a plastic layer that is print receptive and cushions the print head during printing. Please contact Direct Color Systems for recommended fabrication techniques for this product. Cut pieces are in packages of 50 and boxed in 200 quantities. Contact DCS for a quote on other custom size pieces. **Warning: Printing on the wrong side of this material can cause print head damage that will not be covered under warranty.**
